UAE WOMEN

Index Report 2012

Shamsa Saleh

CEO of Dubai Women Establishment

It comes as no surprise that the results documented in this report confirm the unique position attained by the UAE in the goal of women's empowerment – one that has proved far superior to many other countries with a much longer legacy of fostering equality between men and women.

In terms of education, 51% of annual college graduates in the UAE are women; this has resulted in a high percentage of female employment, making up 77% of public sector and 12.6% of private sector employees. In terms of politics and senior public positions, Emirati women hold 4 government portfolios and make up 17.5% of the current Federal National Council (2011 – 2013). In the business world, Emirati women have taken huge strides in holding and managing senior positions of responsibility and prominence.

The achievements of Emirati women in balancing stimulating careers with the duties involved in nurturing a happy family life have been lauded by the international community. This would have not been accomplished if not for the vision of the UAE's leadership – led by H.H. Sheikh Khalifa Bin Zayed Al Nahyan, President of the UAE, and H.H. Sheikh Mohammed Bin Rashid Al Maktoum, Vice President and Prime Minister of the UAE and Ruler of Dubai. Their forward thinking attitude and firm commitment to ensuring women take their rightful place within the growth and development of the UAE has empowered Emirati women to meet and surmount career and family-related obstacles, and grow their presence and prominence in every sector. In this context, The UAE Women Index Report will play a key role in supporting decision makers in the direction they take towards creating a more balanced and well-knit social fabric – one that takes into consideration current realities in the social and professional sphere

and that is more capable of accurately documenting, for the attention of the international community, the UAE's efforts in closing the gender gap.

This index will serve as a solid reference that will be updated periodically, and will include all relevant information required to make it an authoritative resource and reference for researchers, doing away with the need to communicate with several entities to gain access to desired information. The report includes information based on the International Gender Gap Report, in addition to statistics on the economy, education, politics, society and health.

Introduction

The UAE's population has grown to 8.26 million in mid-2010, comprising 6.16 million males, and 2.1 million females, according to the figures by National Bureau of Statistics.

The estimates show that the population of nationals is 948,000 comprising 479,100 males and 468,900 females, while the expatriate population stands at 7.316 million, with 5.68 million males and 1.63 million females.

As per estimates by the National Bureau of Statistics, the UAE's population witnessed growth from 2006 to 2010 from 5.012 million, with 851,160 UAE nationals in 2006.

Generally, the UAE has witnessed a continued increase in population over the few past years, led by the noticeable expansion and growth in economic activity. The United Arab Emirates is the second-largest Arab economy today with the inception of a large number of companies and local and global institutions, which have contributed to the growth in population, especially that of expatriates.

As of mid-2010, Abu Dhabi is the most populous emirate in the UAE with a national population of 404,500 (comprising 204,000 males and 200,400 females) followed by Dubai with 168,000 nationals (84,200 males and 83,800 females). The population in the other emirates is: Sharjah - 153,360 (78,800 males and 74,500 females); Ajman - 42,200 (21,600 males and 20,600 females); Umm Al Quwain -17,500 (8,670 males and 8,800 females); Ras Al Khaimah – 97,500 (49,200 males and 48,350 females) and Fujairah – 64,860 (32,500 males and 33,370 females).
